Product Quality

Exceptional Service

2017 CATALOG

*We Answer with Quality*

*Quality Aluminum Products*
Our product line includes aluminum siding, soffit, fascia, trim coil, and rain carrying products. We also distribute Exteria Building Products (brick, stone, and shake), and Rafab (vinyl porch and deck railings).

The Clark family has been active in the building products industry for over 60 years. Bud and Bob Clark began their careers with Wolverine Aluminum in the early 1950’s. They started Clark Brothers Metal Fabricators in 1971. Clark Brothers was a manufacturer of residential building products with manufacturing plants in Grosse Ile, Michigan and Orlando, Florida. They also had distribution centers in Nashville, Tennessee, Jacksonville, Tampa and Sarasota, Florida. In 1984, Clark Brothers was acquired by World Mark Corporation. The Clark Brothers stayed on in management positions until 1990 at which time they resigned and started Quality Aluminum Products, Inc. In 1991, they opened the doors with a facility in Flat Rock, Michigan. Quality Aluminum has been blessed with steady growth and currently operates two manufacturing sites. The latest addition is our 110,000 sq. ft. facility located in Hastings, Michigan. This has given us additional room and opportunity for expansion into growing markets.

We currently deliver materials from the East coast to the Midwest and as far as Lewiston, Idaho. We are looking forward to the opportunity to serve your needs in the future. If you have any suggestions on how we can better serve you please call us at 1-800-550-1667.

Three important factors rank Quality Aluminum as a leader in the building products industry. First, is our product quality. We manufacture residential and light commercial building products to one of the highest standards in the industry. Our Home Ventilation Institute certified vented products are the key to protecting your most valuable asset...your home. With a large selection of siding, soffit, fascia, trim and rain carrying products, available in our wide range of designer colors, we can assure your home will stand above the rest. Second, is our competitive pricing. Quality Aluminum strives to sell a high quality product at a fair market value. Finally, is our exceptional, second to none service. We can tailor our service to meet your specific needs by offering less than carton quantities, custom bending, and convenient delivery options. We can also help you with your special orders.

We take pride in our high quality products, competitive market pricing and exceptional service. We are dedicated to our customers and their needs as evident by our many loyal distributors who value our commitment to the building product industry. If you demand excellence in product, pricing and service—choose Quality Aluminum Products.

85 to 95% of our current aluminum alloy consists of recycled material.

WHY VENTILATE?

A “balanced ventilation system” should be a priority. With this system, wind flowing over the roof ridge creates a negative pressure drawing the warm air from the attic. Cool air enters through a properly vented soffit system cooling the roof and exiting through roof, gable or ridge vents. Even on calm days the natural ability of rising warm air maintains a continuous airflow all year with no energy consumption or mechanical parts. Normal building code requirements of ventilation or net free area (NFA) –the total unobstructed area through which air can enter or exhaust with a non-mechanical ventilation system, are as follows: Minimum NFA of one square foot of ventilation for every 150 sq. ft. of attic floor space.

OR

Minimum NFA of one square foot of ventilation for every 300 sq ft of attic floor space, if: 50% to 80% of the required ventilation area is provided by vents located in the upper portion of the space to be ventilated at least 3 feet above the eave/soffit vents with the balance of the required ventilation provided by eave or cornice vents. (2000 Michigan Residential Code)

OR

Minimum NFA of one square foot of ventilation for every 300 sq. ft. of attic floor space, when a vapor barrier of 1 perm or less is installed on the warm side of the ceiling.

Everyday activities in your home can cause major problems for your roof and attic. Proper ventilation is the key.

In cold weather, warm moist air can be generated by simple home activities such as showers, laundry and cooking.

In warm weather, heat build up can occur causing premature aging of wood structure and roofing materials. Heat also transfers back into your living space reducing the home’s energy efficiency.
The following matrix shows our certified NFA soffit values placing Quality Aluminum Vented Soffit as a leader in the industry.

(Always confirm specific requirements with local building codes)

All Vented Soffit is tested by TEES-ESL per the HVI 916, air flow test procedure for Net Free Area (NFA). Test results are certified by the Home Ventilating Institute (HVI).

Everflashing was developed to greatly reduce the possibility of water intrusion. It has been ranked #34 in Building Products Magazine’s “Top 100” decking products for 2010. When used as part of a complete deck flashing system, Everflashing’s perimeter flashing is designed to allow decking products to expand and contract, while maintaining a clean, finished perimeter edge. Available in 1 1/2” or 2 1/8” profiles in G185 galvanized for use with treated lumber, color matched aluminum for MicroPro or L3 Lumber or stainless steel for salt water applications.

Contact us for more information on Everflashing when you begin your next deck project.
CUSTOM BENDING

NEED HELP WITH A SPECIAL BENDING PROJECT?

Quality Aluminum Products can make complicated bending projects easy with our CNC Metal Folding System located at our Hastings facility.

It can handle aluminum or galvanized material in a variety of colors and gauges. Highly accurate and repeatable bends are achievable utilizing the system’s automatic back gauging, clamping and bending in lengths up to 12’.

Contact us so we can quote that special project.
FREIGHT & SPECIFICATIONS

FREIGHT AND TRANSPORTATION POLICY

Please contact customer service or your sales representative for updated freight rates, zones or shipping options. Minimum order requirements and freight charges are subject to change.

BACK ORDERS: Valid back order items (less than 90%) will be shipped prepaid on our truck with customers next order.

MERCHANDISE RETURN POLICY: No returns will be accepted until a material return authorization form has been processed and approved by the sales office.

1. All authorized returns will be subject to a 20% service charge and return freight charges where applicable.
2. Special orders, broken cartons, or damaged material are not returnable for credit.
3. Credit will not be issued for materials purchased after a period of ninety days (90) from invoice date.
4. In order to process your credit it is necessary to have invoice numbers and date of the original purchase.

BROKEN CARTON POLICY: A 20% up-charge will be assessed on all broken cartons, no returns.

COATING SPECIFICATIONS

COATINGS: Dura Coat XT-20 single coat. Baked on polyester, coated over prime coat.

GLOSS: 10 to 14 on 60 Degree Digital Gloss Meter. ASTM Test D523-80

FLEXIBILITY: No removal of finish with 610 Scotch Tape on @T Blend. ASTM: D-4145-83 PVC. No removal of finish with 610 Scotch Tape on OT Blend. ASTM D-4145-83

ADHESION: Excellent. ASTM D 4146

IMPACT: No visual cracking or finish release when subjected to impact in inch pounds equal to one and one half times the metal thickness. ASTM D2794-93.

HUMIDITY RESISTANCE: No loss of gloss, cracking or peeling after 500 hours @ 100% relative humidity. ASTM D 2247-86A.

SALT SPRAY RESISTANCE: No under-cutting of film from edges in excess of 1/16” or face blistering after 1,000 hours @ 5% neutral salt spray. ASTM B 117-85.

EXTERIOR EXPOSURE:

A. FADE: Max. 5 units after 10 years at 45° south Florida Exposure after removal of external deposits. ASTM D 2244-85.

B. CHALK: Max. 6 units rating on all colors with the exception of white within 10 years at 45° south Florida Exposure. ASTM D 659-86.

DRY FILM THICKNESS: .75 - .85 mils PVC 3.3-3.7 mils.

SOLVENT RESISTANCE: 100+ Double MEK rubs.

SPECIAL NOTES:

Flowvent is tested by TEES-ESL per the HVI 916, air flow test procedure for Net Free Area (NFA). Test results are certified by the Home Ventilating Institute (HVI).

MATERIALS

All aluminum products are made of 3105 or equivalent aluminum alloy and H-16 or equivalent hardness.

THICKNESS:

.009” Nominal-Economy RF
.012” Nominal-Standard RF
.014” Builder’s Soffit-Drip Edge
.019” Nominal-Siding, Soffit, Trim Coil & Accessories
.024” Nominal-Siding, Fascia and Trim Coil
.027” Nominal-Gutter Coil
.032” Nominal-Commercial Gutter Coil

(All values for aluminum thickness are nominal values and have a variance of +/- .002)
